BEI PHASE 0 BUILDER SUPPORT MANUAL

BASE44 UNDERSTANDING ARCHITECTURE DOCUMENT

Version 1.0

STATUS: MANDATORY

PURPOSE

This document exists to ensure Base44 fully understands BEI before construction begins.

The objective of Phase 0 is not to build.

The objective of Phase 0 is to teach.

No tables should be created.

No screens should be created.

No workflows should be created.

No AI agents should be created.

Until Base44 has demonstrated a correct understanding of:

BEI

Business Twins

Constraints

Decision Intelligence

Opportunity Intelligence

Deployment Intelligence

Learning

Benchmark Evolution

Intelligence Feedback

The purpose of this phase is to reduce architectural drift and prevent incorrect implementation.

PHASE 0 PRINCIPLE

Never upload the entire architecture at once.

Teach Base44 one layer at a time.

Validate understanding.

Then move forward.

The sequence is:

Upload

↓

Explain

↓

Question

↓

Validate

↓

Approve

↓

Proceed

SESSION 1

BEI MASTER CONTEXT

DOCUMENTS

Upload:

BEI Master Context V2.1

ONLY

Nothing else.

OBJECTIVE

Ensure Base44 understands:

What BEI is.

What BEI is not.

PROMPT

Read this document.

Do not build anything.

Explain:

1. What BEI is.
2. What BEI is not.

3. How BEI differs from dashboards.
4. How BEI differs from analytics platforms.
5. How BEI differs from AI reporting tools.
6. What BEI's primary objective is.

VALIDATION QUESTIONS

Ask Base44:

What is the purpose of BEI?

What is a constraint?

What is a Business Twin?

What is a Primary Constraint?

What is the BEI Intelligence Loop?

PASS CRITERIA

Base44 correctly explains BEI.

FAIL CRITERIA

Base44 describes BEI as:

Dashboard

Analytics Platform

CRM

Reporting Tool

NEXT SESSION TRIGGER

Base44 demonstrates understanding.

SESSION 2

BUSINESS TWIN ARCHITECTURE

DOCUMENTS

Upload:

Section 2

Business Twin Architecture

OBJECTIVE

Teach Base44 the Business Twin.

PROMPT

Read the Business Twin Architecture.

Explain:

1. What a Business Twin is.
2. What objects exist inside a Business Twin.
3. How the Business Twin updates.
4. How constraints interact with the Business Twin.

VALIDATION QUESTIONS

What information does the Business Twin store?

How does connector data influence the Business Twin?

Why does BEI require a Business Twin?

PASS CRITERIA

Business Twin explanation matches architecture.

NEXT SESSION TRIGGER

Business Twin understood.

SESSION 3

CONSTRAINT ARCHITECTURE

DOCUMENTS

Upload:

Section 3

Constraint Object Architecture

Section 4

Constraint Library Architecture

OBJECTIVE

Teach Base44 constraints.

PROMPT

Explain:

1. What a constraint is.
2. Constraint lifecycle.
3. Constraint scoring.
4. Constraint confidence.
5. Constraint relationships.

VALIDATION QUESTIONS

What is the difference between a symptom and a constraint?

How are constraints scored?

What is the purpose of constraint confidence?

PASS CRITERIA

Constraint architecture explained correctly.

NEXT SESSION TRIGGER

Constraint logic understood.

SESSION 4

BENCHMARK ARCHITECTURE

DOCUMENTS

Upload:

Section 5

Section 5.5

OBJECTIVE

Teach benchmark intelligence.

PROMPT

Explain:

1. Industry Benchmarks.
2. Benchmark Weighting.
3. Benchmark Evolution.

4. Why benchmarks matter.

VALIDATION QUESTIONS

Why should a £2M business and £20M business have different benchmark logic?

How do benchmarks evolve?

PASS CRITERIA

Benchmark logic correctly understood.

NEXT SESSION TRIGGER

Benchmark architecture understood.

SESSION 5

OPPORTUNITY ARCHITECTURE

DOCUMENTS

Upload:

Section 6

OBJECTIVE

Teach opportunity intelligence.

PROMPT

Explain:

How BEI converts:

Constraint

↓

Opportunity

Explain:

Revenue Impact

Profit Impact

Capacity Impact

Risk Impact

Enterprise Value Impact

VALIDATION QUESTIONS

How should opportunity confidence work?

How should opportunity value be calculated?

PASS CRITERIA

Opportunity framework understood.

NEXT SESSION TRIGGER

Opportunity architecture understood.

SESSION 6

DEPLOYMENT ARCHITECTURE

DOCUMENTS

Upload:

Section 7

OBJECTIVE

Teach execution.

PROMPT

Explain:

1. Deployment Engine.
2. Deployment Packages.
3. Approval Framework.
4. Outcome Measurement.
5. Rollback Framework.

VALIDATION QUESTIONS

Can BEI deploy automatically?

When should human approval be required?

How does outcome measurement work?

PASS CRITERIA

Deployment architecture understood.

NEXT SESSION TRIGGER

Deployment architecture understood.

SESSION 7

DECISION INTELLIGENCE

DOCUMENTS

Upload:

Section 8

OBJECTIVE

Teach BEI reasoning.

PROMPT

Explain:

1. Primary Constraint.
2. Decision Intelligence.
3. Priority Logic.
4. Recommendation Logic.

VALIDATION QUESTIONS

How does BEI decide what matters most?

Why is Decision Intelligence required?

PASS CRITERIA

Decision framework understood.

NEXT SESSION TRIGGER

Decision Intelligence understood.

SESSION 8

LEARNING ARCHITECTURE

DOCUMENTS

Upload:

Section 9

Section 9.5

OBJECTIVE

Teach learning.

PROMPT

Explain:

1. Learning Engine.
2. Intelligence Feedback.
3. Self-improving intelligence.

VALIDATION QUESTIONS

How does BEI improve over time?

What improves after every business?

PASS CRITERIA

Learning framework understood.

NEXT SESSION TRIGGER

Learning framework understood.

SESSION 9

CONNECTOR ARCHITECTURE

DOCUMENTS

Upload:

Section 10

OBJECTIVE

Teach integrations.

PROMPT

Explain:

1. Connector Layer.
2. Data ingestion.
3. Deployment integrations.
4. Connector validation.

VALIDATION QUESTIONS

How do connectors influence Business Twins?

How do connectors influence constraints?

PASS CRITERIA

Connector architecture understood.

NEXT SESSION TRIGGER

Connector architecture understood.

SESSION 10

BUSINESS HEALTH ARCHITECTURE

DOCUMENTS

Upload:

Section 11

Section 11A

OBJECTIVE

Teach scoring.

PROMPT

Explain:

Business Health.

Growth Score.

Operations Score.

Risk Score.

Constraint Priority.

KPI Framework.

VALIDATION QUESTIONS

How is Business Health calculated?

How is a Primary Constraint prioritised?

PASS CRITERIA

Scoring architecture understood.

NEXT SESSION TRIGGER

Scoring architecture understood.

SESSION 11

USER EXPERIENCE

DOCUMENTS

Upload:

Section 12

OBJECTIVE

Teach product experience.

PROMPT

Explain:

User Journey.

Onboarding.

Constraint Dashboard.

Decision Centre.

Deployment Centre.

Outcome Centre.

PASS CRITERIA

User experience understood.

NEXT SESSION TRIGGER

UX architecture understood.

SESSION 12

TECHNICAL ARCHITECTURE

DOCUMENTS

Upload:

Section 13

OBJECTIVE

Teach implementation architecture.

PROMPT

Explain:

Database Structure.

Entity Relationships.

Permissions.

Workflows.

Automation Layers.

PASS CRITERIA

Technical architecture understood.

NEXT SESSION TRIGGER

Technical architecture understood.

SESSION 13

ROADMAP & BUILD SYSTEM

DOCUMENTS

Upload:

Section 14

Section 14.5

BEI MVP 1 Build Operator Manual V4

OBJECTIVE

Teach construction sequence.

PROMPT

Explain:

1. Build order.
2. Dependencies.
3. Validation strategy.
4. MVP scope.

PASS CRITERIA

Build sequence understood.

NEXT SESSION TRIGGER

Roadmap understood.

SESSION 14

FINAL COMPREHENSION AUDIT

NO NEW DOCUMENTS

PROMPT

Using every document previously uploaded:

Explain:

1. What BEI is.
2. What a Business Twin is.
3. What a Constraint is.
4. What a Primary Constraint is.
5. How Constraint Verification works.
6. How Constraint Networks work.
7. How Decision Intelligence works.
8. How Opportunities are calculated.
9. How Deployment works.
10. How Outcome Measurement works.
11. How Learning works.
12. How Benchmark Evolution works.

13. How Intelligence Feedback works.

14. How the entire BEI Intelligence Loop operates.

FINAL VALIDATION

Ask:

If you were building BEI from scratch tomorrow:

What would you build first?

What would you build second?

What would you build third?

What would you never build before the foundation exists?

PASS CRITERIA

Base44 explains the architecture consistently.

No major misunderstandings.

No architectural drift.

No incorrect assumptions.

PHASE 0 COMPLETE

Once Session 14 passes:

Construction may begin.

At this point Base44 has been taught the architecture and can begin Phase 1 Foundation Build.

END OF DOCUMENT.
